Re: Exposure Drafts: The Conceptual Framework for Financial Reporting in the Public Sector & Consequential Amendments Arising from the Proposed Conceptual Framework

Dear Sir,

Thank you for the opportunity to comment on the above-noted documents. MNP LLP is one of Canada's largest chartered professional accountancy and business advisory firms, with a significant focus on clients in the public sector. We believe that we are well positioned to provide feedback on this important issue.

We have reviewed the Exposure Drafts and have provided our response to the specific questions noted below.

Question: Do you agree with the concepts in the proposed Conceptual Framework?

We agree with the concepts in the proposed conceptual framework. The framework is comprehensive and provides a strong foundation for creating future standards. As well, it serves as a foundation of basic concepts to be relied upon for accounting policy decision-making when an issue is not specifically addressed at the standards level.

Question: Do you agree with the consequential amendments outlined in this Exposure Draft?

We agree with the consequential amendments arising from the proposed conceptual framework.

We would be pleased to offer our assistance to the PSAB for any future proposed changes to PSAS.

MNP LLP is one of Canada's largest chartered professional accountancy and business advisory firms. Our clients include small to mid-size owner-managed business in agriculture, agribusiness, retail and manufacturing as well as credit unions, co-operatives, Indigenous communities, medical and legal professionals, not-for-profit organizations, municipalities and government entities. In addition, our client base includes a sizeable contingent of publicly traded companies.

Yours truly,

MNP LLP

Dear Michael:

RE: PSAB Exposure Draft: Consequential Amendments Arising from the Proposed Conceptual Framework

Thank you for the opportunity to provide comments on the exposure draft titled, “Consequential Amendments Arising from the Proposed Conceptual Framework.” The views expressed in this letter reflect the views of the Government of the Province of British Columbia, including central agencies, ministries and entities consolidated into the British Columbia Summary Financial Statements. The Summary Financial Statements of the Province are prepared in accordance with Canadian Public Sector Accounting Board (PSAB) standards.

We appreciate the effort required to provide the detailed consequential amendments and have the following comments as some of the proposed changes could be interpreted as changes in practice.

- _ Currently PS 2130, measurement uncertainty, does not state that it deals only with _ estimation uncertainty and users may be considering other factors including realization _ uncertainty. If current estimates do include realization uncertainty or other factors, the _ amounts could change. _
- _ We do not agree with the changes proposed to PS 2100.02. The new Conceptual _ Framework does not prevent preparers from exercise professional judgement and _ choosing the accounting policy alternatives that best represent the financial activities of _ the entity. _

.../2

- PSAB should ensure consistency between the Conceptual Framework and the Handbook when defining the accountability objective for users versus decision makers of the financial statements.

Please consider this letter to be the response to the specific question posed in the Exposure Draft. Should PSAB have any comments or questions, please contact me at: 250-387-6692 or via e-mail: Carl.Fischer@gov.bc.ca, or Diane Lianga, Executive Director, Financial Reporting and Advisory Services Branch, at 778 698-5428 or by e-mail: Diane.Lianga@gov.bc.ca.

On behalf of the Government of British Columbia,

Sincerely,

Carl Fischer, CPA, CGA
Comptroller General
Province of British Columbia
Encl.

Dear Mr. Puskaric:

SUBJECT: The Conceptual Framework for Financial Reporting in the Public Sector and
 related Consequential Amendments

Thank you for the opportunity to comment on the Exposure Draft (ED) *The Conceptual Framework for Financial Reporting in the Public Sector*. Our response to the specific question posed is provided in Appendix A below.

Please note that we have no comments on the ED *Consequential Amendments Arising from the Proposed Conceptual Framework*, as it appropriately reflects the proposals in the Conceptual Framework.

If you have any further questions related to these comments, please do not hesitate to contact either Blair Kennedy at blair.kennedy@tbs-sct.gc.ca (613-404-2996) or myself at diane.peressini@tbs-sct.gc.ca (613-369-3107).

Yours sincerely,

Diane Peressini
Executive Director,
Government Accounting Policy and Reporting

c.c.: Roch Huppé, Comptroller General of Canada
 Roger Ermuth, Assistant Comptroller General, Financial Management

Response to Question Posed

1) Do you agree with the concepts in the proposed Conceptual Framework?

Overriding comment: linkage to International Strategy

Due to the International Strategy adopted in 2020, in which PSAB decided to adapt IPSAS principles when developing new standards, we believe that PSAB's conceptual framework should be better aligned with that of the IPSAB. Otherwise, we foresee significant issues going forward with this strategy. Our specific concerns are noted in the responses below.

In addition, we have reviewed the recently issued document comparing PSAB's and IPSAB's conceptual frameworks. While this high-level summary identifies some of the issues that we have raised, we have concerns that:

- the theoretical aspects of the differences in the conceptual frameworks have been minimized in favour of current practice (e.g. the differences in the definitions of assets and liabilities, as explained below), and
- there is insufficient consideration of how these differences will impact the application of the recently proposed changes to the GAAP hierarchy.

We agree with the proposed concepts in the conceptual framework except as follows:

Chapter 3

Service capacity concept

We agree with the change in the description of the service capacity concept, as addressed in Chapter 3, which recognizes that financial statements only report on certain aspects of service capacity. However, when considering alignment with IPSAS, we believe that those aspects of service capacity recognized in financial statements can be further broken down into "operating capacity" and "financial capacity", where:

- Operating capacity is the capacity of the entity to support the provision of services in future periods through physical and other resources.
- Financial capacity is the capacity of the entity to fund its activities.

This distinction is used by IPSASB in selecting the most appropriate measurement bases for assets and liabilities, and, therefore, we suggest that the concepts of operating and financial capacity be considered for inclusion in PSAB's conceptual framework.

Chapter 8: Elements of Financial Statements

As stated in our response to the SoC, we are not in agreement with the element definitions for assets and liabilities because the expectation of receiving or sacrificing future economic benefits has been retained in these definitions. Consequently, there is a lack of alignment with the asset and liability definitions of the IPSASB. In addition, it is not clear why the concept of "expectation" of receiving or sacrificing future economic benefits is discussed in Chapter 9 with respect to realization uncertainty but is not discussed in Chapter 8 where it first appears.

We acknowledge that other respondents to the SoC did not support removing the requirement that an asset embodies the expectation of future economic benefits from the definition because it may lead to

more work to identify assets that will not be recognized. However, as demonstrated in our example below, this requirement may also create a lack of transparency in Canadian public sector financial statements, and a lack of consistency and comparability between public sector entity financial statements.

- Whether an entity expects to receive future economic benefits from a resource is an entity-specific concept. Embedding this requirement in the definition of an asset may result in an item with the capacity to provide future economic benefits meeting the definition of an asset for one entity but not for another. We believe that the intrinsic characteristics of the economic resource itself should drive whether it meets the definition of an asset. This same conceptual argument can be applied to the proposed liability definition, which requires that there is an expectation that future economic benefits would be sacrificed.
- The Government of Canada's investments in capital subscriptions of multi-lateral development banks (MDBs) is an example of different element definitions in PSAS versus IPSAS leading to different accounting results. Some MDBs are characterized as "non-concessional", as they are profitable and issue highly rated debt instruments. The substance of the subscription to the share capital of most non-concessional MDBs is that of a puttable investment – the investing government may withdraw at anytime by putting back its investment to the MDB, and is entitled to receive back its initial investment plus its pro rata share of the net earnings (the investment cannot be sold in a secondary market). Given that the Government of Canada generally does not expect to withdraw its subscription, there is no expectation of realizing future benefits, and, consequently, these investments have been fully provided for and treated as transfer payments in our financial statements. However, other national governments do not fully provide for these investments as they are not impaired: those applying IFRS/IPSAS measure their capital subscriptions in non-concessional MDBs at fair value. The differences in the definitions of elements and the recognition criteria have led to a different accounting treatment under IPSAS compared to PSAS for the same investments.
- Consequently, we believe that PSAB should adopt the asset and liability definitions in the IPSASB's conceptual framework. Any practical issues related to additional work to identify assets and liabilities under these definitions that would not be recognized because they cannot be measured can be dealt with at the standards level.

In addition, we have concerns that equity ownership, although relatively rare in the public sector, is not reflected in the elements. By comparison, the IPSASB's conceptual framework includes "ownership contributions" and "ownership distributions" as elements whereas PSAB views any equity ownership interest as a subcomponent of net assets/liabilities.

- The discussion in the Basis for Conclusions, paragraphs 8.39-8.41, states that, as an equity ownership interest represents a subcomponent of net assets/liabilities, this should not be considered a separate element. We believe that this is a circular argument because it is dependent on the definitions of revenues and expenses, and the IPSASB excludes ownership contributions and distributions from these definitions.
- Consequently, we find it is not clear how the proposals for issued share capital in PS 1202 fit into PSAB's element definitions, nor does the conceptual framework support why other types of ownership interests are not considered in the same way as share capital.

In our opinion, the lack of alignment with the IPSASB's element definitions is likely to lead to issues adapting IPSAS when developing new PSAS in the future and in applying the recently revised GAAP hierarchy.

Chapter 9: Recognition and Measurement

Recognition

We do not agree with the proposed recognition criteria and believe that the recognition criteria are aligned with those of the IPSASB.

As noted in our response to the SoC, we believe that the recognition criteria in IPSAS, i.e. an item is recognized when it meets the definition of an element and can be measured in a way that achieves the qualitative characteristics and takes account of constraints of information, is more conceptually sound than that proposed in PSAB's conceptual framework. Additionally, under IFRS, the recognition criteria state that recognition is only appropriate if it results in both relevant information about the element being recognised, and faithful representation of that element. In both the IPSAS and IFRS frameworks, uncertainty about the expectation of receiving or sacrificing future economic benefits is reflected in the measurement of the asset or liability.

Notwithstanding the above, with respect to the recognition criteria proposed in the ED, we do not agree with:

- Recognition criterion 9.05(b): this is redundant given that the expectation of receiving or sacrificing future benefits is already embodied in the definition of an element.
 - As noted above, we believe that the expectation of receiving or sacrificing future benefits should be removed from both the element definitions and recognition criteria, and instead be reflected in the measurement of the item, consistent with IPSAS and IFRS.
- Recognition criterion paragraph 9.05(c) as written: this criterion states "the item, transaction or other event can be measured".
 - This statement does not provide sufficient information for entities to make a judgement on measurement. Additional clarity is needed based on the qualitative characteristics of information, such as whether the measurement of the item faithfully represents what it purports to represent, whether the information is relevant and whether it takes into account the constraints on financial information.
 - Consequently, we suggest changing this recognition criterion to align with that used by the IPSASB as noted above; i.e. to state "that the item can be measured in a way that satisfies the qualitative characteristics of information and takes account of constraints on information...". We believe that emphasizing the qualitative characteristics of information provides clearer guidance on whether an item can be measured and which is the appropriate measurement basis to be used. This links back to the chapters on the objectives of financial information and financial statement objectives.

Measurement – Historical Cost

We do not agree with the description of historical cost in 9.32(a), as historical cost should be an entry value that is based on, or derived from, an initial transaction price that reflects the resources given up to acquire an asset, or the resources received to assume an obligation. Specifically, in our opinion, historical cost cannot be applied when a liability does not arise from a transaction between parties, and may not provide relevant information when a liability arises from a non-exchange transaction or varies in amount due to estimates involved related to its settlement.

- Where liabilities have no initial transaction price (e.g. liabilities for contaminated sites), the initial estimate, and subsequent changes in estimate, reflect the cost to exit the obligation at the financial statement date. The measurement requirements for these liabilities are not derived

from a historical transaction price. In our opinion, the use of current estimates that measure the amount to exit these liabilities does not reflect historical cost measurement.

- Consequently, we suggest that the measurement of these types of liabilities would be better represented by a current cost basis, such as the IPSASB's "cost of fulfillment" or IASB's "fulfillment value".

We urge PSAB to review the work currently underway by the IPSASB on measurement, including the proposed measurement models, measurement bases and measurement techniques. This work considers whether the appropriate measurement is current or historical, reflects an exit or entry value, and is entity-specific or non-entity-specific. In particular, we suggest that PSAB considers including the cost of fulfillment measurement basis for liabilities in the conceptual framework, to measure those liabilities for which there is no initial transaction price or is based on an estimate to exit the obligation.

Given PSAB's international strategy, using the same measurement concepts as the IPSASB will alleviate issues that may ultimately arise if historical cost is not defined in the same way, or when other measurement bases are used in IPSAS but are not introduced in PSAB's conceptual framework.

Q1. Do you agree with the concepts in the proposed Conceptual Framework as described in Exposure Draft, "The Conceptual Framework for Financial Reporting in the Public Sector"? Yes

Q2. Please provide comments to explain your response above.

Overall, we believe that the new conceptual framework will provide a complete, relevant, and updated set of concepts that will guide PSAB in developing new standards on a prospective basis. This will also create a foundation for the application of accounting policies, guidance on standards, as well as the presentation for the financial statement. We continue to advocate and bring awareness to PSAB that the primary users are the public and those elected to oversee public entities. This is confirmed in the conceptual framework and therefore it is important to consider these primary users when developing standards that may increase their confusion and lead to further distrust of public financial statements. Providing clear standards with examples will help to remove creative interpretation and will go far in this regard. Areas such as recognition and measurement are prime examples as there is currently plenty of room for creative interpretation and determination of variables that have big impacts to the measurement of the financial transactions.

Q3. Do you agree with the proposed consequential amendments outlined in Exposure Draft, "Consequential Amendments Arising from the Proposed Conceptual Framework"? Yes

Q4. Please provide comments to explain your response above.

No further comments.

Dear M. Puskaric:

Re: Exposure Drafts: The Conceptual Framework in Financial Reporting in the Public Sector, and Consequential Amendments Arising from the Proposed Conceptual Framework

This letter includes our response to the following two exposure drafts:

With respect to the *Exposure Draft: The Conceptual Framework in Financial Reporting in the Public Sector* (January 2021), we are in general agreement with the concepts outlined in the proposed Conceptual Framework other than a few concerns as outlined in the attachment. In addition, the attachment sets out suggested improvements.

With respect to the *Exposure Draft: Consequential Amendments Arising from the Proposed Conceptual Framework* (January 2021), we agree with the proposed consequential amendments.

Yours truly,

Judy Ferguson, FCPA, FCA
Provincial Auditor

JR/dd

Attachment

	Question	Response
1	Do you agree with the concepts in the proposed Conceptual Framework?	<p>Overall we are generally supportive of the proposed concepts other than following concerns:</p> <p>Chapter 2:</p> <ul style="list-style-type: none"> ▶ Paragraphs 2.11 to 2.70 Characteristics of Public Sector Entities – while we are supportive of the removal of the definition of “government” from the glossary, we find the shift of the terminology between public sector entities and governments throughout somewhat confusing. For example, paragraphs 2.22 to 2.23 refer to “governments”, whereas these can also be powers, rights and responsibilities afforded to “public sector entities”. To clarify, we suggest describing the relationship between the terms “government’ [government level –used in 2.29),” public sector entity”, “government organizations” and “components”. That is, public sector entity can encompass a government, a government organization and component. Note: this is similar to the concern expressed about the term ‘government’ on page 5 to Question 5 in the 15 January 2019 Joint response of the Canadian Auditors General to the related Statement of Concepts. ▶ Paragraph 2.33 – While paragraphs 2.47 to . 50 appropriately reflect variations exist, we question the accuracy of paragraph 2.33 as it relates to governments’ overall budgets in that it implies the approval of an overall budget is always required. Rather for some senior governments (like Saskatchewan), the legislators are only required to approve the Estimates (an subset of the overall budget) and there is no formal approval of the overall budget. To clarify, we suggest PSAB consider providing additional guidance as to what constitutes “appropriate authority” (referred to in proposed PS1202.198) in situations where legislatures of sovereign governments do not approve overall budgets. <p>Chapter 6:</p> <ul style="list-style-type: none"> ▶ Paragraph 6.31: As noted in our response to PS 1202, we disagree with allowing the presentation of amended budgets in the statement of operations. Rather, we think, new governments should explain variances from the originally approved budget; explanations may include changes

	Question	Response
		<p>made under its control (e.g., different priorities, new programs or removal of programs).</p> <ul style="list-style-type: none"> › Chapter 6: We suggest PSAB (when discussing financial and non-financial resources and obligations) explicitly linking the determination of economic resources or economic obligations to the identification of assets and liabilities as described in proposed PS 1202.
	<p>Additional comments:</p>	<p>We have identified the following potential areas of improvement:</p> <p>Chapter 1:</p> <ul style="list-style-type: none"> › Paragraph 1.09: We suggest as a consequence of PSAB’s intention to use “basis of conclusions” documents to justify departures from aspects of the Conceptual Framework (even if rare) that PSAB adapt its “Phases of Due Process” to require explicit and early identification where departures are anticipated, and explicit Board consideration of the justification thereof. This would enhance public confidence that such departures serve the public interest. [We fully recognize the Board’s Due Process is outside of the scope of the conceptual framework and standards.] <p>Chapter 2:</p> <ul style="list-style-type: none"> › Paragraphs 2.17–2.21 are silent on the ability of public sector entities to obtain public resources by imposing user fees. The Framework could list this commonly used ability for which provide a substantive source of resources for some entities. › Paragraphs 2.22–2.23 are silent with respect to governments’ power of expropriation. While we recognize the listing is not intended to be all inclusive, we see value in listing this power as it is generally unique to governments, and its inclusion would be consistent with the reference to expropriation in paragraph 5.23 (b).

Re: PSAB Exposure Draft - Consequential Amendments Arising from the Proposed Conceptual Framework

Dear Mr. Puskaric,

We have read the above-mentioned Exposure Draft that was issued January 2021 and are pleased to have the opportunity to provide responses to your specific question as outlined below.

1. Do you agree with the consequential amendments outlined in this Exposure Draft?

We agree with the consequential amendments outlined in this Exposure Draft and appreciate the Board taking the time to fully outline the impacts the adoption of the proposed conceptual framework will have on the rest of the PSA Handbook.

Thank you for your consideration of our response. We would be pleased to elaborate on our comments in more detail if you require. If so, please contact me or, alternatively, Sayja Barton, Director National Accounting Standards (705-963-0824 or email sbarton@bdo.ca).

June 28, 2021

Public Sector Accounting Standards Board
Toronto, Ontario

Dear Michael Puskaric,

Our response to PSAB's exposure drafts *The Conceptual Framework for Financial Reporting in the Public Sector* and *Financial Statement Presentation, Proposed Section PS 1202*, including consequential amendments and detailed amendments (collectively, "the proposals"), are below.

We have provided a combined response to the proposals because of the interrelationships among the proposals.

We recognize the significant efforts of PSAB on its conceptual framework and presentation standards. It is a tremendous achievement.

In response to the specific question whether we agree with the conceptual framework or new financial statement presentation, our answer(s) are "Yes, with suggestions for improvements."

We organize our response as follows:

- General comments of a fundamental nature
- Specific comments on the main proposals. We follow the main categories of reporting changes PSAB used in its presentations to stakeholders during its March 2021 webinars.
- Other comments, on various matters in the proposals.
- Edits and editorial comments.

General comments of a fundamental nature

1. We agree with the overall structure and approach of the conceptual framework. We agree with the "chapters" approach.
2. We agree with the conceptual framework's characteristics of public sector entities, reporting objectives, role of financial statements, financial statement objectives and foundations, qualitative characteristics, elements, and the recognition measurement and presentation concepts. We suggest below areas in which we believe the conceptual framework and reporting proposals can be further strengthened.

3. In our view, the conceptual framework has key areas where it should be better defined. A conceptual framework should be axiomatic: a logical set of statements that are exhaustive, complete, consistent (not contradictory), and useful for understanding and insights. The conceptual framework should further limit use of, or clarify use of, exceptions to fundamental concepts. We agree with PSAB that the proposed framework will allow for future flexibility, but the exceptions may weaken application of the framework. The recourse to future PSAB decisions or individual standards may not be sufficient if there is not a strong conceptual framework to act as a safeguard.
4. In our view, the root cause of some concepts not being better defined is that the conceptual framework and presentation standards are at an intermediate stage of a much broader trend: a movement from fund accounting to a more private sector model with a pure asset/liability and “clean surplus” approach, to now a more “modified” asset/liability model with “accumulated other” and where “not all changes in an entity’s financial position are necessarily included in surplus or deficit” (CF 6.25). The statement of net assets is starting to resemble various “funds” or “reserves” (“pure” surplus, remeasurements, and other). Perhaps the proposals represent a stage on a longer-term trend back towards fund accounting, but without a focus on operating and capital and restricted funds. In previous responses to PSAB, we suggested alternative presentations including measures of surplus that incorporate capital maintenance. In the private sector a distinction between capital and operating is crucial due to the rate of return calculation that is necessary for private financial capital, but this is not as crucial or even applicable for public sector entities. We encourage PSAB to consider whether a different approach starting with liabilities first, and expenditure-driven concepts, may better assist in resolving conceptual issues that the proposals are attempting to deal with, including capital transfer deferrals, non-financial liabilities, “accumulated other” and the “flexibilities” that the proposals set up to appear in various statements.
5. A liability and expenditure driven approach would be consistent with the “after-capital deficit” used by ratings agencies and readily understandable by citizens, to which public sector entities are accountable. We encourage PSAB to consider adding to its proposals a statement of “after-capital deficit” (or similar indicator) and then develop the implications of an accounting that includes a focus on such a key indicator.
6. Broadly, it is not clear what approach to public sector reporting (either a pure asset and liability model, or the modified asset and liability model) that is being proposed, or perhaps even a return to a fund model (capital fund, operating fund, endowment fund) is better. The proposals maintain features of public sector financial reporting that best serve democracy (the broadest accountability value): accrual (versus cash) accounting, recognizing capital assets, and reporting net debt. Recent developments such as fair value remeasurements, or the proposed “accumulated other,” are not so clear, as we explain later. Various accountability and transparency values are involved: highlight sustainability or flexibility or vulnerability issues and provide information for capital markets/debt holders (as net debt did), or highlight issues of service capacity and capital maintenance, as recognizing capital assets does, or perhaps provide more relevant valuation information, as remeasurements do. Perhaps the pure asset and liability model improved accountability to the budget (because deferrals were

avoided) and improved comparability. It is not clear whether PSAB should retrench the pure asset and liability model (no deferrals, no unrealized gains and losses, no “accumulated other”), shift back to accrual fund accounting (which may resolve capital/operating matters), or continue with some limited departures from a pure asset and liability model as proposed.

7. We agree that PSAB should fundamentally use an asset and liability approach. We agree that previous proposals that suggested a hybrid or revenue/expense approach were limited. However, PSAS previously was a much clearer instance of the asset and liability approach. With the proposals, it has moved somewhat closer to a hybrid approach, in particular with allowing remeasurements and “accumulated other.”
8. An asset and liability approach requires a clear concept of realization to distinguish among revenues and expenses and direct increases in net assets and remeasurements and “accumulated other” if these are also part of the model, and for the surplus/deficit indicator to retain its full accountability and transparency value. BC 8.13 explains that under the asset and liability model, financial statements are limited to economic phenomena of assets and liabilities and changes in these (revenues and expenses). We agree. However, the proposals do not necessarily follow this; otherwise unrealized remeasurements and accumulated other and direct changes to net asset would not be allowed. Because there was no revenue or deferred revenue, there cannot be an increase in an asset (ruling out unrealized fair value remeasurements) nor an increase in assets due to a direct credit to net assets. We are concerned about PSAB allowing departures from the asset and liability model, and not introducing or elaborating important concepts (such as realization) that are necessary when one moves away from a pure asset and liability model.
9. We note the proposals suggest that these allow for future flexibility. We agree with the need for flexibility. However, too much flexibility risks reducing the effectiveness of the standard setting process, and impairing consistency and comparability. For example, respondents to future exposure drafts may argue that an undesirable debit is an “accumulated other” rather than an operating expense, or they may argue that a particular liability is “non-financial” and therefore should be excluded from net financial liabilities. Additional concepts in the conceptual framework may help PSAB better evaluate such arguments, so transparency and accountability do not decline.
10. The proposals suggest that “accountability value” will guide future efforts in resolving some of the issues identified above. However, it is difficult to determine what is “accountability value.” It is not clear how one can argue fair value remeasurements, or deferred revenue, should or should not be part of the statement of operations if the only principle is “accountability value.” Various contradictory positions can be legitimately supported by “accountability value” and therefore it is not a sufficient sole principle for a conceptual framework to guide future standards. More guidance is needed.
11. We are concerned that the elements are derived from one single concept/element: an asset. Because the other elements are derived from one single underlying concept, the definitions tend to become circular and too interdependent. This causes the definitions to lose some meaning, specifically because they are defined only in terms of each other, rather than being

more independent concepts. Because we use a double entry system, there are at least two concepts occurring in every accounting entry. For example, an asset may be increased with a corresponding revenue, an asset and liability may be incurred at the same time, etc. However, defining only one element (an asset) and having every other element be defined based on that asset concept/definition creates a weakness in the framework, as it becomes difficult to determine what are non-assets i.e. liabilities, revenues, or direct increases in net assets. The “other” side of the accounting entry has lost some necessary conceptual meaning. This results in a diminished ability of the conceptual framework to help resolve questions as to whether something is a liability (and what “kind” of liability), or a revenue, or some kind of change in net assets, or a revaluation, or an “accumulated other.”

12. We suggest that PSAB improve the proposals by better defining at least the following five elements: assets, liabilities, revenues, expenses, and net assets. We suggest PSAB consider starting its definitions with liability rather than assets. Starting with assets is useful for private sector entities whose ultimate goal is wealth (asset) maximization of the entity, which is wealth (asset) maximization of the entity’s owners. However, as the proposals emphasize, the nature of a public sector entity is fundamentally different: it is to provide/deliver services. There is a separation between assets used in service delivery and how those assets are financed: public sector does not have return on invested capital. Public sector entities do not usually generate cash from their tangible capital assets. In this sense, revenue and liabilities “fund” or “drive” the delivery of services, either via an expense (delivery of a service) or a capital asset (support infrastructure useful to citizens/stakeholders of the public sector entity also used to deliver services). By starting with the definition of a liability – in the sense of obligation to deliver services to stakeholders – and proceeding from that, PSAB can better incorporate the fundamental differences between the public and private sector. Note that starting with a definition of a liability may help resolve some of the issues we note with liabilities below.
13. In CF chapter 9, regarding the measurement attribute, we believe that historical cost should be the primary measurement attribute, with the addition that fair value remeasurements that are other than temporary (for all assets and liabilities), including remeasurement gains or remeasurement losses, could be recognized within a historical cost framework.
14. We encourage PSAB to explore whether the concept of “other than temporary” may be applied to both remeasurement gains and losses. We note that a conservatism (prudence) test is not applied for including fair value adjustments for gains in asset/liability balances on the statement of financial position – the unrealized gains are considered to be as real as the unrealized losses. However, other than temporary losses are considered “real” and recorded in surplus. Perhaps PSAS should not make such a distinction between other than temporary losses and other than temporary gains, and instead allow other than temporary unrealized gains to also be recognized in the statement of operations and surplus.
15. Accountability value is preserved and promoted by allowing other than temporary gains as well as losses to be recognized in surplus, because an enduring increase in value of an asset is as real as an enduring loss. In contrast, temporary fluctuations arguably reduce accountability value because management has little control over them, and they may lack useful information

value because they may reverse. The issue is made more problematic for those financial instruments for which their valuation is correlated with volatility: a public sector entity may take on greater risk in a portfolio investment (with exposure to greater volatility in value at measuring date) mitigated by the entity's ability to hold the investment in the long term. Quoted market prices at the financial statement date will provide the fair value for the investment at that point in time, but may not represent the value management will be able to realize on the investment.

16. The concept of “other than temporary” is present in the standards where a loss in a portfolio investment, if considered other than temporary, is recognized into surplus, and also reflected in the amortization of experience gains/losses in pension accounting which smooths out shorter term changes to reflect more enduring experience and changes in the valuation of pension obligations. The concept was also reflected in the previous accounting for foreign exchange gains/losses where offsetting gains/losses would smooth out over the life of the asset/liability – becoming more pronounced closer to the maturity/settlement date.
17. Recognition of both other than temporary gains and losses, including remeasurements, may help deal with the volatility that keeps remeasurement gains and losses out of the statement of operations and the net debt indicator, because both “other than temporary” remeasurement gains or losses would be included in operations, not remeasurement gains and losses. This would separate less volatile (enduring) gains and losses from the more volatile recent fluctuations – allowing users a better understanding of how much of the remeasurements in value reflect enduring changes in value that should be considered realized and how much are still volatile and uncertain. It may also help gain acceptance for the conceptual framework and presentation standards, and the new financial instrument standards, if gains and losses were treated consistently (not favoring one over the other) and acknowledged that write-downs may eventually be reversed, if they are later found to be not other than temporary.
18. Acceptance of enduring (other than temporary) gains being recognized in surplus on the statement of operations, just as enduring (other than temporary) losses have been, provides an opportunity to re-evaluate the accountability value that the residual short-term volatility that remains in remeasurement gains and losses adds to the financial statements. For example, PSAB may consider the enduring increased value of a portfolio investment to be a more reliable measure of its value, without the short-term noise of market volatility, and relegate short term volatility in market values to note disclosure. If this approach were to be adopted (with a return to amortizing foreign currency revaluations), explanation of the remeasurements in the statement of change in net assets would not be necessary. Without remeasurement gains and losses, we also note there may no longer be a need for a separate statement of change in net financial liabilities, allowing the net debt indicator to remain on the statement of financial position, and more clearly preserve PSAB's asset and liability model and the “clean surplus” approach.

Specific comments on the main proposals

We provide comments below on proposed changes to the reporting model. We organized the section below according to the main topics in PSAB's March 10, 2021 presentation.

New 3rd component of net assets: accumulated other

19. We note the flexibility that “accumulated other” provides in dealing with particularly difficult issues, such as endowments or Crown assets. However, we do not agree with the “accumulated other” concept, without more precise concepts of net assets, control and realization being included in the conceptual framework. We believe net assets may need to be independently defined as an element, rather than defined as a residual of other elements, if it is going to be something other than the mathematical accumulation of prior surplus/deficits. We agree that it is not as straightforward to define “net assets” as for private sector organizations, or even for not-for-profit organizations. However, we believe it is important to independently define because it may help resolve other conceptual issues.
20. In our view “accumulated other” results from a vagueness in the concept of “control” that is in the definition of asset. This is best illustrated with accounting for endowments. We note that the conceptual framework has not resolved whether endowment contributions are revenue (that would be on the statement of operations), but we also do not think that endowments (or other matters, such as Crown assets) necessarily merit creation of “accumulated other”. If a pure asset/liability model is used, with the concept of realization, perhaps endowments would not meet criteria for recognition as assets and may be better presented as trust funds under administration. If the entity is not free to use the endowment fund as it chooses, how does the entity have “control” of the asset? We note this also has implications for restricted assets PS 3100, and government transfers and revenue accounting, where the “performance obligation” concept seems to be recognizing that the control over the asset is incomplete, or has not yet been realized, before recognition of revenue occurs. It may be that an entity should not record the asset unless it has (or will have as a result of its actions) unencumbered control. If this will never occur for some items, such as may be the case for endowments, perhaps PSAB should consider these as trust assets with restrictions under administration, that are not recognized in the entity’s financial statements. We agree with recognition of the asset, and deferral of revenue, when the entity has the ability to remove the restrictions, and retain the asset, through its own actions, as is the case with capital transfers.
21. We suggest that PSAB adopt a fundamental recognition and measurement principle that all accounting requires at least two of the conceptual framework elements¹. For example, an asset would only be recognized if a corresponding liability, revenue or net asset is also recognized.
22. If PSAB is to follow a more hybrid model with increases or decreases to assets and liabilities that do not immediately correspond to revenues or expenses i.e. remeasurement gains and losses, or accumulated other, then the framework should more clearly articulate where and why (beyond “accountability value”) it deviates from an asset/liability model, and how it would be determined whether additional items should be deferred for later recognition, or recognized in surplus/deficit for the period. We refer to this as “realization.”

¹ Except for reclassifications between captions with elements e.g. accounts receivable to cash.

23. We suggest the proposals include the concept of “realization.” Realization is distinct from recognition. “Realization” should be defined in the conceptual framework such that it can be used to clearly determine whether and when an item is included on the statement of operations or directly in net assets. In our view, how the draft Conceptual Framework 8.23-8.27 defines revenue and expenses (as an increase or decrease in net assets) may not be sufficient to determine if a credit or debit is a revenue or expense that should first be on the statement of operations (and then in net assets), or something “unrealized” that is directly in net assets, or something to be realized directly into net assets. With a “clean surplus model” (where the only changes in net assets are surplus) which is more associated with a “pure” assets and liability approach, this issue does not arise. The examples in 8.24 and 8.26 are not sufficient because they are merely examples, not concepts.
24. Proposed 1202.081-.083 and 1202.135, along with existing PS 3400, may not be sufficient as “realization” concepts. They require that items would not be reclassified from net assets to the statement of operations unless there was a clear and objective basis for identifying the period in which the classification should occur and the amount involved. We agree with this requirement, but believe it is not sufficient to guide future standard setters or financial statement preparers in determining which approach should be followed in recognition, including matching, consumption, culmination of a service delivery process, agreement to budget, satisfaction of a performance obligation, systematic and rational (usually consider straight-line), etc.
25. Proposed PS 1202.115 and PS 1202.116 state that all revenues and expenses are recognized in the statement of operations unless a standard requires otherwise, and some standards may specify circumstances when a revenue and expense are outside a period’s statement of operations. Our concern is that without a clearer concept of “realization” to guide application of PS 1202.115, over time standards may lack consistency. It will be difficult to argue from concepts and principles within the due process of setting standards what is the most appropriate accounting without shared concepts of realization (as would be defined in the conceptual framework). Successor Public Sector Accounting Boards may make different decisions over time across standards as to what should be in surplus/deficit and what should be directly recognized in net assets. Arguments by analogy (although specifically prohibited by PSAB in the proposals) may become unavoidable if/when “accumulated other” becomes used in several standards, especially if the “Introduction to public sector standards” still contains paragraph 27, which recognizes that “no rule of general application can be phrased to suit all circumstances” and allows for exercise of professional judgment. Surplus or deficit, one of the most important indicators of a public sector entity, may lose its strong conceptual foundation, and therefore diminish accountability.
26. Specifically, the proposals could better clarify what concepts are being applied when an item moves among categories of net assets. For example, unrealized remeasurement gains and losses move to accumulated surplus through the statement of operations. Do all items in accumulated surplus also move through the statement of operations into accumulated surplus? Alternatively, can some items (i.e. endowments perhaps) move among categories in accumulated surplus without passing through the statement of operations? Could items also move out of accumulated surplus back into financial liabilities or non-financial liabilities? It

would be better to have more defined concepts to guide PSAB's future thinking on this, beyond "accountability value."

27. "Accountability value" may be too vague as a concept to support a clear realization concept. A much more explicit and developed concept of realization would be useful. A more developed realization concept may draw upon elements of the concept of "defer and match," or "culmination of the operating process" or "satisfaction of a performance obligation" or some other foundation. Other frameworks support "defer and match" including IAS 20, and Canadian ASPE (3800). IAS 20.17 states "In most cases the periods over which an entity recognizes the costs or expenses related to a government grant are readily ascertainable." The proposals could adopt an approach like IPSAS's "other resources" and "other obligations," which we acknowledge are not elements, but also better preserve transparency because it is possible for users to see within assets and liabilities which are the "other" items, rather than these being netted into "accumulated other." Some of these items in accumulated other, especially those that do not soon settle to surplus/deficit, may have long lives (or perpetual lives), and over time, as they accumulate into one "accumulated other" number, losing economic meaning, or have several accumulated others (as 1202.BC.048 explains), further moving PSAS towards fund accounting. It is not clear how the PS 1202.136 requirement, to report the fact of revenue or expense permanently reported outside of surplus or deficit, would practically be implemented for many disparate "permanent items" that would accumulate over the time, especially if PS 1202.136 implies their nature, extent and "permanence" is disclosed. These are beyond presentation issues (as CF BC8.16 notes) and are fundamental conceptual issues within the asset/liability model. We note the concept of "realization uncertainty" in CF 9.11-9.17 is distinct from but related to what we are suggesting here and CF 9.11-9.17 are not sufficient to deal with the lack of a comprehensive "realization" concept incorporated into the conceptual framework.
28. To reinforce, due to some vagueness in the concept of "control", net assets not being defined independently but as a residual, and lack of a realization concept, "net assets" risks becoming a "catch all" for a variety of unrelated things and surplus/deficit may over time lose accountability value. Except for correction of errors, it should not be possible for items in net assets to move out of net assets and into the statement of operations or liabilities. We note that rather than "accumulated other" items, perhaps an additional element "unrealized items" may provide flexibility without compromising net assets (assets = liabilities + unrealized items + net assets). The proposals could require disclosures such as nature of unrealized items and changes in unrealized items. Such an approach preserves the essential concept that what is in the net assets of an entity is actually its accumulated surplus or deficit, and users do not need to be concerned that net assets will fluctuate without an actual transaction occurring due to volatility of unrealized gains/losses. We realize this "shifts" the issue to other parts of the statement of financial position, or perhaps to an "intermediate" area of "unrealized items" between total liabilities and net assets, but in our view it makes it much more transparent, especially if "other resources" and "other obligations" disclosures similar to PS 1202.143 (for accumulated other) are required. Net assets (surplus) would be defined as items that are realized (with a clearly developed realization concept), and at least two elements would be needed to be met for recognition.

29. PS 1202.144 states that “accumulated other” transactions and events designated by PSAB will be “in individual standards.” We note that PS 1202.145 states that as transactions and other events are reflected in accumulated other, “this Section will be updated.” We are unsure what the updates to the Section will be: a list of standards that allow “accumulated other,” or something in PS 1202, or perhaps more fundamentally, it may be what is meant instead is that the “conceptual framework” will be updated. It could be that some of the more difficult issues that accumulated other is designed to allow flexibility for would, upon a standards-level project, result in other changes to the conceptual framework, such as we have suggested above (new element, more precise realization concept). Although it would be unusual for a standards-level project to consequentially amend the conceptual framework, PSAB could acknowledge this in the conceptual framework itself.
30. PSAB should also consider consequential amendments are necessary that would remove the inconsistency between government transfers and restricted assets (noted in PS 1202 footnote 18). PS 1202 footnote 23 seems to amend PS 3100 but uses the unclear language of “it may be possible to analogize to PS 3410.” It is not clear given footnote 23 whether or not revenue could be deferred over the life of an asset which was purchased with restricted assets. The statement in footnote 18 that revenue could not be deferred over the life of the asset is too restrictive (restrictions on the contribution may be met over this period of time).

Restructured statement of financial position

31. We support the restructured statement of financial position. We agree with the categories “total assets” and “total liabilities.” We also agree with the split between financial and non-financial for each of these elements, however we have some concerns which we note herein.
32. With the restructured statement of financial position, public sector entity financial statements will report a new indicator – total assets. We encourage PSAB to fully develop within its conceptual framework the accountability value of this new indicator. It may represent total (gross) service potential of the entity and there may be stakeholder decisions or specific accountabilities that arise from it.
33. In our view, showing the components of net assets directly on the statement of financial position makes the statement less readable and understandable. It introduces a breakdown of net assets into something like fund accounting, but does not show which assets and liabilities are reflected in each “fund.” We believe the only component of net assets should be accumulated surplus or deficit. If kept, the other items (remeasurements and accumulated other) should be placed elsewhere, as “something” between total liabilities and net assets. We agree with PSAB not adopting the approach of IPSAS which recognizes “other resources” and “other obligations.”

Amended non-financial asset definition

34. We agree that a concept of non-financial assets is a useful distinction for public sector entities. It allows users to see the investment in service generating or service providing assets of the entity.

35. There are important and specific accountabilities of public sector entities with respect to non-financial assets, including their use in service delivery, proper and adequate maintenance, and safeguarding. Therefore, non-financial assets should not be defined as what are simply not financial assets, but instead should be defined on their own. The definition should be such that the categories of financial and non-financial assets are distinct.
36. We are concerned with the definition of non-financial assets as “assets that do not meet the definition of financial assets” because it is not clear what part of the definition is not being met. In PS 1202.045 the definition of a financial asset is “an asset that could be used to discharge existing financial liabilities or spend on future operations and is not for consumption in the normal course of operations.” So what part of the definition does a non-financial asset not meet? That it is an asset that could not be used to discharge existing financial liabilities? Or that it could be used to discharge existing non-financial liabilities? To illustrate, accounts receivable by itself could not be used to discharge existing liabilities (they would need to be collected or factored first) or could not be spent on future operations (until they are collected), even though accounts receivable is not for consumption in the normal course of operations; accounts receivable meets part of the definition of financial asset (i.e. it is not for consumption) but does not meet other parts of the definition. Conversely, land could be used to discharge existing liabilities or spent (granted/sold) on future operations and is not for consumption in the normal course of operations, so could meet the financial asset definition.
37. We note that the restructured statement of financial position will have a net assets or net liabilities indicator at the bottom. We also note that there will be a statement of net financial assets or net financial liabilities. But there is a potential for these terms to be used interchangeably, or perhaps even confused. The terms “net liabilities” and “net financial liabilities” will differ, in general, by the amount of tangible capital assets, which may be substantial for many public sector entities. Under extant PSAS there is much less risk of this because of the structure of the statement of financial position, because net debt is on the statement of financial position, and because “accumulated deficit” may be used instead of “net liabilities.” As we propose elsewhere, we believe net assets should be reserved only for accumulated surplus/deficit, so PSAB could consider retaining the term accumulated surplus/deficit for the bottom line of the statement of financial position, to adequately distinguish it from “net financial liabilities.”

Financial and non-financial liabilities

38. We agree with the concept of non-financial liabilities, but suggest the definition should be improved. The definition in PS 1202.084 that the obligation “cannot” be settled with financial assets can be improved because any liability can be settled with financial assets (i.e. cash). If liabilities are in two categories (financial and non-financial), and if non-financial is something that cannot be settled through the use of financial assets, then logically financial liabilities are what can only be settled through the use of a financial asset. If there are liabilities that can be settled through either financial or non-financial assets, are these financial or non-financial liabilities? Either one category should be designated as the default

for liabilities that can be settled with either financial or non-financial assets, or three categories of liabilities are needed (liabilities that can only be settled through financial assets, liabilities that cannot be settled with financial assets, and liabilities that may be settled with either financial or non-financial assets, at the option of the public sector entity).

39. We note the proposed narrow definition of non-financial liabilities may prohibit the non-financial liability category being used, specifically for particular capital transfer liabilities under PS 3410. This may be counter to what PSAB intends with the category of non-financial liabilities. Capital transfer liabilities often arise from stipulations that require repayment of the capital transfer or payment of financial penalties if the asset is not used as stipulated. Because these would be settlements of the liability with financial assets, the proposals may not allow the “non-financial liability” category to be used. In particular, PS 1202.086 states that the non-financial liability cannot be settled through the normal operations of the entity. But it is not clear how use of an asset (amortization) would not be normal operations of an entity, and what other bases for settlement of a non-financial liability PSAB intends. We note that consequential amendments proposed to PS 3410.23A state a capital transfer for purpose of acquiring or developing a tangible capital asset used to provide services would be a non-financial liability. But it is unclear when PS 3410.23A applies. Does PS 3410.23A only apply if the transfer stipulations do not specify a penalty for non-use of the asset? What if other stipulations indicate that the ‘liability’ could be settled through financial assets?
40. We illustrate our concern below with the definitions of financial and non-financial liabilities, which do not lead to binary classification as they are both restrictive.

		Liability may be settled with		
		Financial assets only	Either Financial or Non-Financial Assets	Non-Financial Assets only
Expected to be settled with	Financial Assets	Financial Liability	Financial Liability	
	Non-Financial Assets		Other Liability	Non-financial Liability
	Not sure		Other Liability	

Shaded cells note combinations that seem not possible with the proposals. Note that for two of the combinations, the liability would be neither a financial nor a non-financial liability. So it seems there is a third “other liability” category, or at least several unclear matters:

- If an entity could settle a liability with a non-financial asset or with a cash payout, is it by definition not a non-financial liability as they must be settled only with non-financial assets?
- If an entity is not sure whether financial or non-financial assets will be used to settle the liability, then is it not “expected” that financial assets will be used, so not a financial liability?

- If an entity could use either financial or non-financial assets to settle the liability, and plans to use non-financial assets, is the liability financial or non-financial?
41. The proposals should clearly describe the accountability value of non-financial liabilities. As noted elsewhere, we suggest it is best explained if combined with the realization concept, at least for non-financial liabilities for which “revenue” hasn’t yet been realized. They may be better described as “liabilities which will settle to revenue.”

Net debt, revised net debt calculation, and removing statement of changes in net debt

42. We agree with relocating net debt to its own statement. We believe the statement of net financial liabilities is useful in providing the net debt indicator. We support the future flexibility it provides, to remove items that are in assets or liabilities on the statement of financial position from the calculation of net financial assets or liabilities. However, we caution that PSAB may need a better conceptualization of the use of the net financial liabilities indicator to prevent exceptions that would dilute the accountability value of the net financial liabilities indicator. For example, conceivably actuarial changes in pension obligations should be excluded, or changes in asset retirement obligations, or restricted financial assets such as endowments, or unrealized remeasurements.
43. Regarding the statement of change in net debt being no longer required, we note that information regarding non-financial performance with respect to capital maintenance and service capacity would no longer be reported with sufficient prominence: the comparison of actual capital expenditures to budgeted capital expenditures and the comparison of capital expenditures to amortization are key indicators of the entity’s non-financial (capital maintenance) performance. Disclosing this information in a note may not be sufficient. We believe that the statement of change in net financial assets or liabilities should be required disclosure.
44. We believe net debt is a key financial sustainability indicator. We recognize PSAB is dealing with how to keep a fundamental performance measure in the financial statements with increased complexity on the statement of financial position caused by non-financial liabilities, as well as other issues such as net debt volatility (beyond control of an entity) due to (fair value) remeasurements. We note that the proposals attempt to maintain the “original meaning” of net debt indicator. However, the proposals have not resolved the debate about whether the statement should emphasize the net debt indicator or the performance of the public sector entity in managing its finances (i.e. excluding components of net financial liabilities that are more volatile and not derived directly from management decisions).
45. We disagree with the PS 1202.103 wording that is proposed to be added to the statement of net financial liabilities. We note that PS 1202.103 states the explanation “could be as follows” but it is not clear when an entity would include language other than what is in PS 1202.103, or what would prevent financial statement discussion & analysis (FSDA) type of discussion from being added, in effect “editorializing” the primary statement. One problem with describing net financial liabilities as a lien is that it may be legislative non-compliance for a particular public sector entity to issue liens, or guarantees, or similar such instruments.

We are also unclear who the holder of the lien is (present or future citizens?), and what happens if the lien is exercised. (We realize it is not an actual lien, but either lien should be put into “lien” quotes or the language should explain it really isn’t a lien). The wording is also ideological: a less ideological wording would be “net financial liabilities represent the amount by which the public sector entity has not obtained sufficient revenues from individuals and organizations, for the costs of the services they have received.”

46. We support that the statement of net financial liabilities or net financial assets disclose which financial liabilities or financial assets are included if they are not the same as the financial assets and financial liabilities on the statement of financial position. We note that this may become complicated and require a reconciliation. For example, if in the future PSAB determines to exclude fair value remeasurements from the statement of net financial assets, then a reconciliation would be useful. An alternative would be further subtotals on the statement of financial position e.g. Assets, then Financial Assets, then Financial assets included in net debt, then Financial Assets not included in net debt, then Non-financial assets, then Total assets.

New statement of change in net assets

47. We agree with the new statement of change in net assets. We believe that a statement of change in net assets is necessary given the rest of the proposals. However, in our view the statement of change in net assets indicates some limitations in the proposals.
48. The statement of change in net assets should be very straightforward: it should be opening net assets, plus realized items (i.e. surplus), with any adjustments such as corrections of errors. Instead, the proposed statement of change in net assets includes many other things, such as accumulated remeasurement gains and losses and accumulated other. We believe that net assets should be kept conceptually precise: it should be limited to realized items. Items should not come out of net assets and move into either assets or liabilities, or revenue or expense. Users should be able to trust that the net assets number is what it says it is: net assets. More precision in the conceptual framework would result from defining net assets as its own element, that is not a residual, and further defining the concept of “realization” as we note elsewhere.
49. We disagree with having “components” of net assets, as this mixes both unrealized and realized amounts. In our view, to preserve more of the asset/liability model and a “clean surplus” approach to net assets several items that are currently in net assets, such as accumulated other and remeasurement gains and losses, should be moved to a separate area of the statement of financial position, after Total Liabilities, called “Unrealized items and other.” The separate breakdown of components of net assets on the statement of financial position would then be unnecessary. We also note that in the illustrated financial statements in PS 1202 appendices, “Net assets” should be of the same prominence as “ASSETS” and “LIABILITIES” and therefore should be in all caps “NET ASSETS.”

Statement of cash flows

50. We support the proposed statement of cash flows. However, we disagree with the subtotal before cash flows from financing. If a subtotal is necessary on the statement of cash flows, we suggest the subtotal is shown after operating and capital, and before investing and financing. Operating and capital activities are the main activities of a public sector entity providing services to its stakeholders. How these operating and capital activities are funded may be through operations themselves (i.e. surplus), through sale of investments, or through incurring debt. Similarly, cash that remains after operations and capital have been paid for can be used to buy investments or repay debt. Therefore, the key subtotal in the statement of cash flows, if any subtotal is going to be added, should be cash provided by or used by operating and capital activities.

New budget requirements, legislation and legislative authorities

51. We agree with the main proposals regarding budget and authorities, and include the following suggestions. We note that 1202 now includes several requirements for budgets and suggest PSAB consider whether a separate standard within PSAS, budget to actual comparisons, may be more appropriate for these requirements and guidance.
52. We disagree that an amended or new budget should be prepared when the “government” changes. When a “government” changes, a fiscal year end is not triggered: the “new” government becomes accountable for all the financial decisions that the public sector entity’s financial statements will report on for that period in which the change occurs, not just transactions occurring from the date the government “changed.” There is a “continuity” of the public sector reporting entity. The budget originally approved by the public sector should be the budget presented in the financial statements. We also disagree with PS 1202.198 (b) for the same reasons with respect to change in officials of the governing body of a government organization; the original budget should be used for comparison in the financial statements.
53. As 1202.190 states, the original budget is “the budget for which an entity is held accountable.” We note the “entity” is still the public sector entity before and after the change in elected officials. With respect to permitting an amended budget when the “government” changes due to an election, in our view this indicates that PSAB considers the “government” i.e. elected officials, to be part of the public sector entity. The elected officials have changed, so the budget of the public sector entity merits being changed. However, elsewhere the proposals state that financial reporting provides accountability-relevant information to the public and their elected representatives, which indicates that the elected representatives are separate from the “government” and are users of the financial reporting. If elected officials are not part of the public sector entity, it is not clear why a change in the elected officials would merit an amended budget. The proposals could explain why elected officials are considered part of the public sector entity for some aspects of accountability and not part of the public sector entity for other aspects of accountability.
54. We note a change in elected officials could occur any time, including up to or perhaps even after a year end. Allowing an amended budget as proposed may then reduce the

accountability value of budget to actual comparisons if the budget would be prepared at the same time as the financial statements.

55. We support the proposals for adjusting the budget to a GAAP basis if necessary as in 1202.194. However, we suggest PSAB consider the following, perhaps as amendments to SORPs: When it is necessary for a budget to be restated to GAAP, disclosure is encouraged for the public sector entity to explain why the budget was not prepared on a GAAP basis, which other comparable public sector entities also prepare their budget on a non-GAAP basis, and how the non-GAAP budget serves accountability purposes. This is similar to practices in the private sector regarding use of non-GAAP measures.
56. Paragraph 1202.190 says the original budget is the budget originally planned at or near the beginning of the accounting period. This presupposes a planning cycle in which an entity prepares and approves a budget at or near the beginning of the reporting period. This may not be the case as some public sector entities may be able to operate for extended periods of time without a budget, and may therefore approve a budget at or near the end of the accounting period. (We note that PSAB should clarify whether in this circumstance the authorities for spending that are being used constitute a “budget” and in general to what degree a budget may depart from PSAS and still be considered “prepared” as used in PS 1202.196). The date at which the budget was approved and the dates the budget is amended are useful disclosures so users understand if the budget was approved at or near the beginning of the period or much later.
57. PS 1202.194, footnote 31, states that the scope of the budget would be considered different from the scope of the financial statements if a material entity or program is not included in the reporting entity’s approved budget. This would require restatement of the budget. We agree that not including a material entity is a scope difference, but we note that public sector entities may announce new programs through the period as a matter of course, so we disagree that new programs should be considered scope differences. PSAB should remove the words “or program” from footnote 31.
58. PS 1202.197 requires that if a reporting entity does not have a budget for a material controlled entity, the reporting entity is not considered to have a budget and so the budget is not presented in the financial statements. In our view, this may reduce accountability to the reporting entity’s budget that was prepared. We note that the stand-alone budgets of controlled entities may typically include inter-entity transactions which are routinely eliminated in the budget of the reporting entity, so the budgets of the controlled entities are already being “amended” or “adjusted” when being combined at the reporting entity level. We suggest instead that 1202 requires the reporting entity to prepare the appropriate budget (for this controlled entity) for the reporting entity’s financial statement purposes. Being able to create a budget for the reporting entity’s financial statement purposes is consistent with the definition of control that the reporting entity has over the controlled entity. We agree that in the financial statements of the controlled entity, no budget would be presented.
59. We note a concern with CF 10.25 and PS 1202.020 where disclosure is required by legislation of information that is inconsistent with standards or the conceptual framework. It

is not clear whether these would be departures from PSAS GAAP (perhaps leading to a qualification in an independent auditor's report as well), or not PSAS GAAP departures because they are specifically required to be in the disclosures by proposed CF10.25 and PS 1202.020.

60. Regarding disclosing non-compliance with financial authorities, paragraph CF 6.32 says financial statements should provide information regarding whether the entity's activities were administered in accordance with "requirements and limits" established by authorities, but the next sentence in 6.32 says "were not carried out within the limits authorized by the financial authorities." It would be better to state "were not carried out within the requirements and limits authorized by the financial authorities" because there may be requirements not met that are still within limits (e.g. issuing foreign debt may not be allowed, but issuing Canadian debt may be).
61. We suggest PSAB clarify in 1202 whether reporting on legislative authorities are for the consolidated government reporting entity, or all entities within the government reporting entity. For example, a controlled entity may have exceeded its spending authority. It is not clear if that means the consolidated government reporting entity itself has exceeded its spending authority, particularly because what is an external restriction at the controlled entity level may be an internal restriction (or not a restriction at all, at the level of the consolidated budget of the government reporting entity) at the government reporting entity level.

Other comments on specific areas

We provide below our comments on various specific areas in the proposals.

Risk disclosures

62. We agree with the proposed risk disclosures. However, we note that PSAB should avoid duplication with risks and other disclosures that would be more appropriately reported under the SORPs in financial statement discussion and analysis.

Subtotals in the statements

63. PS 1202.37 and .38 introduce subtotals to the financial statements. We agree with the proposal but suggest additional guidance be provided on their use. For example, an entity could propose a subtotal of "controllable expenses" and "uncontrollable expenses." We suggest additional guidance be provided on use of subtotals, which may be achieved by including the footnoted requirements (in CF 10.24) directly in PS 1202.37, and better explaining what "accountability value" in CF 10.24 (d) means in the context of subtotals.

Share capital

64. We agree with the concept of share capital being added to the proposals. We note that PSAB may consider adding a project to define specific issues associated with accounting for public sector entities with share capital.

Crown assets exclusions

65. We do not agree conceptually with the recognition exclusions (e.g. natural resources, assets in right-of-Crown or intangibles). Recognition of these assets promotes stewardship for their use and also full accounting for when these public assets are sold or disposed of, as well as consideration of retirement obligations associated with these assets. However, we agree there are significant issues involved with their recognition, valuation and measurement. Further research is needed. We think there are specific amendments that could be made to PSAS at this time, including that transfers of assets that have not been recognized in the financial statements (for example, Crown land) should be recognized in the financial statements at the fair value of the land (i.e. revenue for the recognition of the land at fair value, and expense to recognize its transfer). Showing the value of Crown assets transferred promotes stewardship by making the government or public sector entity accountable for its use, maintenance and disposal of Crown assets.
66. We noted earlier our concerns with “accumulated other.” We caution that “accumulated other” may not provide PSAB with the ability to deal with issues in the future such as heritage resources, intangibles, and natural capital (as 1202.BC.043(b)(v) indicates). To illustrate, PSAB may anticipate (following 1202.BC.048) using “accumulated other” for initial recognition of Crown assets, with the credit going to accumulated other, bypassing surplus/deficit so surplus/deficit is not “distorted.” However, accounting for subsequent transactions is more complicated if accumulated other is used; the accounting is not as complicated if all inflows and outflows are through the statement of operations (or if considered a new accounting policy, retroactive with restatement could be used on initial recognition). These Crown assets may be used, exchanged, transferred, or depleted through a number of activities. Would royalties received from use or sale of the Crown assets also bypass surplus/deficit? Would a “depletion” of the Crown asset be recognized to surplus/deficit or also bypass surplus/deficit? Would changes in value of the Crown asset be part of surplus/deficit or kept in accumulated other until “realized?” Or would the Crown asset be treated like a “fund” where there is the initial set-up of the fund (recognition of the Crown asset bypassing surplus/deficit), and then inter-fund transfers between the “Crown asset fund” in accumulated other(s) and the unrestricted accumulated surplus/deficit, for ongoing depletion of the Crown asset as the asset is consumed via royalties? Our point is if PSAB is intending “accumulated other” to assist with complex accounting matters such as Crown assets, it should develop more clearly a view of the probable resolution of the complexities associated with these matters. “Accumulated other” may not be a solution, or may precipitate a return to fund accounting, as we noted earlier in our response.

Periodicity concept

67. The conceptual framework should describe the periodicity concept. It should explain how periodic annual reporting relates to accountability of an entity. It should also explain when, if ever, including more than or less than 12 months of results may be appropriate. We also note in Chapter 7 the benefit versus cost considerations are connected to periodicity, because the cost to prepare financial information, as well as its benefit, is driven by how often it is prepared. PSAB could comment on matters such as quarterly reporting by public sector entities.

Control

68. We note a concern with the concept of control as described in CF 5.21-5.23. Control is described as something that has to be invoked. We understand that 5.22 is needed to bound consolidation of all entities a public sector entity may “control” given powers of a public sector entity to take control away from others. However, PS 1300.09 is clear that control exists regardless of whether it is exercised. To us “invoked” and “exercised” are likely the same meaning. Our concern is that together these could lead to inconsistencies in the application of the concept of control.

Going Concern

69. Regarding the going concern concept (CF 2.68-2.70 and 9.37-9.40), we note that with the implementation of PS 3430 it is unclear whether PSAS are going concern standards or also standards for entities that are not a going concern (such as a dissolved entity). The matter arises because of PS 3430.07 (h) which says a transferor may continue or cease to exist after the restructuring. We note the going concern concept, via CF 9.39, seems to co-mingle going concern with discontinued operations and restructurings. PS 1202.029 (a) states that going concern considerations include restructurings. We note that PSAS is not making any consequential amendments to PS 3430, yet PS 3430 as explained further in Basis for Conclusions (BFC) to PS 3430, paragraph 43, says because the assets and liabilities “continue” by the recipient then change of the measurement attribute is not appropriate. CF 9.40 perhaps contradicts this when it suggests the measurement attribute may need to be reconsidered if the going concern assumption becomes inappropriate. We suggest the proposals add guidance or consider consequential amendments to PS 3430 or PS 3430 BFC or other guidance as to what measurement attribute should be used (net realizable value, fair value, etc.) and in what “going concern” circumstances, and whether a public sector entity is still within PSAS or not if it changes its measurement attribute in a “non-going concern” circumstance.

Prudence

70. We believe improvements can be made to the concept of prudence. We understand conservatism could have been interpreted too far as understating assets or overstating liabilities, notwithstanding clear guidance in PS 1000.29(d) against this. But the objective is to not err at all. The way prudence is described may be problematic because it is characterized as a “state of mind” or “exercising caution.” It is not clear how a “state of mind” or “exercising caution” can be evaluated by auditors or those charged with governance (if evaluating management) or stakeholders, other than with recourse to the concept of conservatism. Furthermore, as CF 7.45 describes prudence as “not understating or overstating financial statement elements” it is not able to be differentiated from neutrality or faithful representation which are already included as characteristics.

71. We note the change seems directed not against conservatism so much as against recognition uncertainty or measurement uncertainty. To illustrate, entities may “have a cautious mindset” in making any write-down to ensure they are not understating assets. For example, if an entity’s investments fair value has been below carrying value for two years, the entity may argue that it is premature to take a write-down as the value may recover (prudence requires the entity to exercise caution to not understate its assets). CF 7.45 and .46 are not clear how

long an entity should wait to demonstrate it has exercised sufficient caution/prudence. Conservatism was a much clearer concept and the caution against using it to deliberately understate assets or overstate liabilities in existing PSAS was appropriate. We suggest that conservatism be retained as a qualitative characteristic.

72. As described in the proposals, in our view prudence is too similar to fair presentation. A public sector entity should neither deliberately overstate or understate assets or liabilities. Where there is recognition or measurement uncertainty, care should be taken to arrive at best estimates to achieve fair presentation, rather than applying additional caution until recognition or measurement uncertainty is resolved.

ESG disclosures

73. In line with including concepts in the proposals to provide PSAB a basis to deal with future reporting issues, we suggest PSAB consider whether and to what extent public sector financial statements should contain ESG (environmental, social, governance) disclosures, and include these as concepts in the conceptual framework.

Effective date

74. We agree with the proposed effective date because it gives preparers time. However, we believe PSAB should ensure PS 3450 and PS 2601 become effective, for entities that have not yet adopted it, at the same time as PS 1202. This will avoid having to adopt PS 1201 and then PS 1202.

Edits and editorial comments

We provide below various edits and editorial comments.

75. The detailed amendments state that the conceptual framework does not form part of GAAP. However, the amendments to the Introduction clarify that “the conceptual framework and these public sector standards” apply to the general purpose financial statements of public sector entities. PSAB should clarify whether entities would then refer to their financial statements as being prepared in accordance with “public sector accounting standards” or “the conceptual framework and public sector accounting standards.” PS 2100.07 may need to be amended to state that entities disclose that “the financial statements have been prepared in accordance with the Canadian conceptual framework and public sector accounting standards.”
76. In CF 2.66 (f) donations and contributions are considered non-exchange transactions. But as 2.21 indicates, there is an exchange component because donors receive a tax benefit (a charitable donation deduction/credit), which suggests there is an exchange nature to these transactions.
77. CF 3.31 use of “ideally” is unnecessary. PSAB has the ability to set standards for all of (a) through (d) and can achieve the “ideal” through its standards.

78. CF 5.01 should say “this conceptual framework sets out” rather than “a conceptual framework must set out” and 5.02 should refer to “PSAB” rather than “standard setters.”
79. In CF chapter 7 discussion of benefit versus cost, the proposals could add timeliness as a constraint.
80. In the illustration Appendix F, we note that the item “change pertaining to operating surplus (deficit) should be labelled “Surplus/deficit” unless this is meant to be the amounts in surplus/deficit that somehow relate to “net financial liabilities,” in which case amortization likely should not appear (amortization is non-financial). The term “operating surplus/deficit” is not defined elsewhere and it should be clear that this amount is the surplus or deficit from the statement of operations, or it should be explained how this amount is arrived at.

Thank you for the opportunity to comment.

Dear Mr. Puskaric:

SUBJECT: Exposure Draft - Consequential Amendments Arising from the Proposed Conceptual Framework (January 2021)

Grant Thornton LLP and Raymond Chabot Grant Thornton LLP (hereinafter “we”) would like to thank you for the opportunity to provide comments on the Public Sector Accounting Board’s (hereinafter the “PSAB”) Exposure Draft entitled Consequential Amendments Arising from the Proposed Conceptual Framework (hereinafter the “ED”). Overall, we agree with the intention of the ED and have the following response to the general question asked in the ED below:

Do you agree with the proposed consequential amendments outlined in this Exposure Draft?

- **Amending Section 2100, paragraph .04** - The PSAB is proposing the following revision: “Appropriate accounting policies are those that result in fair note disclosure of financial information. It is important that accounting policies be selected to meet this objective.” We suggest that this should be revised to “Appropriate accounting policies are those that result in fair disclosure of financial information in the financial statements and note disclosures”. because appropriate accounting policies also result in appropriate presentation in the financial statements, not just note disclosure.

If you wish to discuss our comments or concerns, please contact Melanie Joseph (Melanie.Joseph@ca.gt.com, 416-607-2736) and/or Stéphane Landry (landry.stephane@rcgt.com, 418-647-5008).

Yours sincerely,

Grant Thornton LLP

Re: Consequential Amendments Arising from the Proposed Conceptual Framework

Dear Mr. Puskaric,

Thank you for the opportunity to provide comments on the Consequential Amendments Arising from the Proposed Conceptual Framework exposure draft. Our comments are below.

Questions

1. Do you agree with the proposed consequential amendments outlined in this Exposure Draft?

Yes, however, we have several concerns that we feel should be addressed before these amendments are made. These are outlined in our response to the exposure draft on the Conceptual Framework.

Sincerely,

Robert E. Bourgeois, CPA, CA
Executive Director, Government Accounting
NS Dept of Finance and Treasury Board

PSAB Exposure Draft: Consequential Amendments Arising from the Proposed Conceptual Framework

Thank you for the opportunity to comment on this exposure draft. Consequential amendments arising from the proposed conceptual framework are important in ensuring consistency. We agree with the consequential amendments arising from the proposed conceptual framework, considering the concerns we addressed in the Exposure Draft on the Proposed Conceptual Framework for Financial Reporting in the Public Sector.

Sincerely,

Dan Stadlwieser
Controller

Exposure Draft: The Conceptual Framework for financial reporting in the Public Sector

Response - Government of the Northwest Territories (GNWT).

Question(s)

1. Do you agree with the concepts in the proposed Conceptual Framework?

The GNWT has no concerns with proposed Conceptual Framework.

Exposure Draft: Consequential Amendments Arising from the Proposed Conceptual Framework

Response - Government of the Northwest Territories (GNWT).

Question(s)

1. Do you agree with the proposed consequential amendments outlined in the Exposure Draft?

The GNWT has no concerns with proposed consequential amendments.

Additional comment(s):

Reliability definition (page 14) appears to be general in nature using “faithfully represented” rather than a more definitive “reliable estimate” from an accounting standpoint. How does one define “faithfully”?

Exposure Draft: Financial Statement Presentation, Proposed Section PS 1202

Response - Government of the Northwest Territories (GNWT).

Question(s)

1. Do you agree with the proposed new financial statement presentation standard?

The GNWT has a few concerns with the proposed consequential amendments listed below.

Additional comment(s):

The GNWT has concerns with the definition of non-financial asset, specifically section 0.60 (e) and how to quantify or value a non-financial asset that cannot be used to settle a financial liability or spend on future operations.

The use and adding the concept of Net Financial assets (net financial liabilities) in place of the current Net Debt on the Statement of Financial position may require engagement and educating users to fill any knowledge gaps, recognizing the elected and appointed officials may not have a sophisticated understanding of complex accounting standards. This change will impact financial ratios used to determine the financial health of the entity. Net debt was one of the indicators of financial health of most Governments. Net Financial Assets/Liabilities will be used as a proxy; however, comparability will be lost and being able to see pertinent information on one statement impacted for the users.

The placeholder of “Accumulated other” will lead to questions by users of the intent of the line item under that section. We understand the need to build a framework that can be used in future years and the need to put “Accumulated Other” as a line item. However, without defining what it is that will be reported under this line item, this might create confusion for users.

2. Do you agree with the effective date of April 1, 2024, to implement the financial statement presentation standard, Section PS 1202?

The GNWT has no concerns with implementation date of April 1, 2024

Additional comment(s):

There is a possible impact from the volume of information that entities (not for profit, NGOs, etc.) would need to review retroactively with the changes for comparability purposes where professional accounting capacity may be an issue with small not for profit or NGOs.

Exposure Draft: Consequential Amendments Arising from the Financial Statement Presentation Standard, Proposed Section PS 1202

Response - Government of the Northwest Territories.

Question(s)

1. Do you agree with the proposed consequential amendments outlined in the Exposure Draft?

The GNWT has no general concerns with proposed consequential amendments.

Monsieur Michael Puskaric, CPA, CMA
Directeur, Comptabilité du secteur public
Conseil sur la comptabilité dans le secteur public
277, rue Wellington Ouest
Toronto (Ontario) M5V 3H2

Monsieur,

Vous trouverez ci-joint les commentaires du Groupe de travail technique Secteur public R Comptabilité dans le secteur public de l'Ordre des comptables professionnels agrés du Québec, concernant l'exposé-sondage intitulé « *Modifications corrélatives au cadre conceptuel proposé* ».

Nous vous serions reconnaissants de nous faire parvenir une copie de la traduction anglaise de nos commentaires.

Veillez prendre note que ni l'Ordre des comptables professionnels agrés du Québec, ni quelque personne que ce soit ayant participé à la préparation des commentaires ne peuvent être tenus responsables relativement à leur utilisation et ils ne sont tenus à aucune garantie de quelque nature que ce soit découlant de ces commentaires, comme décrit dans le déni de responsabilité joint à la présente.

Veillez agréer, Monsieur Puskaric, mes salutations distinguées.

Annie Smargiassi, CPA auditrice, CA
Représentante du groupe de travail technique Secteur public R Comptabilité dans le secteur public

p. j. Déni de responsabilité et commentaires

DÉNI DE RESPONSABILITÉ

Les documents préparés par les groupes de travail de l'Ordre des comptables professionnels agréés du Québec (Ordre) ci-après appelés les « commentaires », sont fournis selon les conditions décrites dans la présente, pour faire connaître leur opinion sur des énoncés de principes, des documents de consultation, des exposés-sondages préliminaires ainsi que des exposés-sondages publiés par le Conseil des normes comptables, le Conseil des normes d'audit et de certification, le Conseil sur la comptabilité dans le secteur public, le Conseil sur la gestion des risques et la gouvernance et d'autres organismes.

Les commentaires fournis ne doivent pas être utilisés comme substitut à des missions confiées à des professionnels spécialisés. Il est important de noter que les lois, les normes et les règles sur lesquelles sont émis les commentaires peuvent changer en tout temps et que, dans certains cas, les commentaires écrits peuvent être sujets à controverse.

Ni l'Ordre, ni quelque personne que ce soit ayant participé à la préparation des commentaires ne peuvent être tenus responsables relativement à l'utilisation de ces commentaires et ils ne sont tenus à aucune garantie de quelque nature que ce soit découlant de ces commentaires. Les commentaires donnés ne lient pas, par ailleurs, les membres des Groupes de travail de l'Ordre ou, de façon plus particulière, le Bureau du syndic de l'Ordre.

La personne qui se réfère ou utilise ces commentaires assume l'entière responsabilité de sa démarche ainsi que tous les risques liés à l'utilisation de ceux-ci. Elle consent à exonérer l'Ordre à l'égard de toute demande en dommages-intérêts qui pourrait être intentée par suite de toute décision qu'elle aurait pu prendre en fonction de ces commentaires. Elle reconnaît également avoir accepté de ne pas faire état de ces commentaires reçus via le Groupe de travail dans les avis exprimés ou les positions prises.

MANDAT DES GROUPES DE TRAVAIL

Les groupes de travail de l'Ordre des comptables professionnels agréés du Québec ont comme mandat notamment de recueillir et de canaliser le point de vue des praticiens exerçant en cabinet et de membres œuvrant dans les affaires, dans les services gouvernementaux, dans l'industrie et dans l'enseignement ainsi que le point de vue d'autres personnes concernées œuvrant dans des domaines d'expertise connexes.

Pour chaque exposé-sondage ou autre document étudié, les membres mettent leurs analyses en commun. Les commentaires ci-dessous reflètent les points de vue exprimés et, sauf indication contraire, ces commentaires ont fait l'objet d'un consensus parmi les membres des groupes de travail ayant participé à cette analyse.

Les commentaires formulés ne font l'objet d'aucune sanction de l'Ordre. Ils n'engagent pas la responsabilité de celui-ci.

QUESTION SPÉCIFIQUE DU CCSP

Appuyez-vous les modifications corrélatives proposées dans le présent exposé-sondage?

Les membres sont d'avis que le travail nécessaire à l'identification de toutes les modifications corrélatives représente un travail colossal qu'ils n'ont malheureusement pas été en mesure de réaliser.

Toutefois, ils appuient les modifications proposées par le CCSP.

RE: Exposure Draft – Consequential Amendments Arising from the Proposed Conceptual Framework

Thank you for the opportunity to comment on the above Exposure Draft. I am responding on behalf of the Office of the Auditor General of Canada.

We are pleased to submit to the Board our response below to the specific question posed in the Exposure Draft.

Sincerely,

Lissa Lamarche, CPA, CA

Assistant Auditor General
Office of the Auditor General of Canada

Specific question posed by the Public Sector Accounting Board (PSAB):

Question 1

Do you agree with the proposed consequential amendments outlined in this Exposure Draft?

OAG response:

We agree with the majority of the proposed consequential amendments outlined in this Exposure Draft (ED). It should be noted that our response focuses on only those areas for which PSAB has proposed consequential amendments and does not consider whether additional consequential amendments may be required as a result of the proposed Conceptual Framework. If other areas are identified in the future, PSAB's annual improvements process could be used to make further consequential amendments as needed. On that basis, we have identified the following proposals for which we have concerns/comments for PSAB to consider as it finalizes its deliberations on this ED:

PSA Section	Paragraph Reference	Comments
<i>Introduction to Public Sector Accounting Handbook</i>	.11, .14-.15, and .17-.24	<p>PSAB is proposing to amend the title of the <i>Introduction to Public Sector Accounting Standards to Introduction to Public Sector Accounting Handbook</i> in an effort to alleviate confusion as to whether the Conceptual Framework forms part of the public sector accounting standards and so, part of generally accepted accounting principles (GAAP). It is clearly stated in paragraph 1.05 of the new Conceptual Framework ED that the proposed Conceptual Framework is not a standard and in paragraph 1.07 does not form part of GAAP.</p> <p>While we do not have concerns with respect to amending the title of the introduction, we find that the proposed amendments do not alleviate the confusion because they seem to be placing the Conceptual Framework on the same level as the standards by referring to both the Conceptual Framework and the standards in each of the noted paragraphs (refer to column to the left).</p> <p>We recommend instead that a paragraph be added (e.g. .10A) in the Introduction to state that the handbook includes the Conceptual Framework and the standards and then the remaining paragraphs retain the existing wording rather than referring to both the Conceptual Framework and the standards.</p>
PS 1300, <i>Government reporting entity</i>	PS 1300.03	There are a couple of references to government in this paragraph that have been retained. The

		<p>proposed amendment currently reads as follows (<u>emphasis added</u>): “Chapter 6...states that <u>government financial statements</u> should...Through its financial statements <u>a government demonstrates its accountability</u>...useful in evaluating <u>a government’s performance</u> in the management...”</p> <ul style="list-style-type: none"> • Chapter 6 of the proposed Conceptual Framework does not state that <u>government</u> financial statements should provide an accounting of the full nature and extent of the financial affairs of an entity. We recommend removing “government” from this sentence so that the statement is factually correct. • We recommend changing the other two references of “government” in this paragraph as well, since PS 1300 applies to all public sector entities and not just government. For example, government could be replaced by entity or public sector entity.
<p>PS 2100, <i>Disclosure of accounting policies</i></p>	<p>PS 2100.04</p>	<p>The first sentence states the following (proposed new wording <u>underlined</u>): “Appropriate accounting policies are those that result in fair <u>note</u> disclosure of financial information.”</p> <p>We have some difficulty with this sentence. Appropriate accounting policies result in fair presentation as they impact recognition, measurement and disclosure. Consider changing “fair note disclosure” to “fair presentation”.</p>
	<p>PS 2100.11 and .12</p>	<p>No changes were proposed to paragraph .11 which states: “<i>All significant accounting policies of a reporting entity should be disclosed in one place</i>” but PSAB has proposed to add paragraph .12 regarding the use of technology which may allow significant accounting policies to be disclosed with their relevant notes “as long as cross-references to such details are included in a single significant accounting policy note.”</p> <p>While paragraph .12 does open the door to new ways of disclosing significant accounting policies, as noted in our response to PSAB’s ED: <i>Financial Statement Presentation, Proposed Section PS 1202</i>, we think that PSAB should consider whether requiring all accounting policies to be disclosed in one note (as per paragraph .11) is the only option that should be allowed.</p> <p>Given that the intent of PSAB’s proposed financial statement presentation standard (<u>emphasis added</u>) is to <u>improve understandability</u></p>

		and provide financial statement users with <u>better information</u> for accountability purposes, this may be an opportunity for PSAB to also consider whether increased understandability might be achieved using other methods, such as those seen by entities using other frameworks in recent years.
PS 2700, <i>Segment disclosures</i>	PS 2700.23	<p>The proposed wording states the following (new proposed wording <u>underlined</u>): “For purposes of their financial reporting, government organizations base their accounting policies on the <u>Conceptual Framework and standards</u>...These would be the <u>Conceptual Framework and standards</u>...”</p> <p>PS 1150, Generally accepted accounting principles paragraph .05 states that accounting policies are consistent with the application of the concepts in the Conceptual Framework only when the primary sources of GAAP do not deal with the accounting and reporting in financial statements of particular transactions or events, or additional guidance is needed to apply a primary source to specific circumstances. The proposed wording in PS 2700.23 seems to suggest otherwise and, therefore, we think that this proposed wording should be removed from this paragraph.</p>
PS 3150, <i>Tangible capital assets</i>	PS 3150.05 (f)	<p>This paragraph is amended as follows (proposed deletion shown): “Service potential is the output or service capacity of a tangible capital asset...”</p> <p>By deleting the word “service” in front of capacity you are left to wonder what kind of capacity this definition is referring to. We recommend adding “to provide services” after “capacity” to be clear as well as consistent with other similar such consequential amendments.</p>
PS 3400, <i>Revenue</i>	PS 3400.66	<p>PSAB has indicated that since the existing Conceptual Framework lists reliability as a qualitative characteristic and the proposed Conceptual Framework replaces “reliability” with “faithful representation”, “reliable” should be replaced with “faithfully represented” in all instances. We do not fully agree.</p> <p>In some instances, we do not see a need to change references to “reliable estimates” when it is referring to estimates used in specific standards. The concept of reliable estimates can be found in other frameworks such as IPSAS and IFRS despite the fact that reliability is not a qualitative characteristic of financial information in</p>

		their conceptual frameworks. Therefore, we do not agree with the amendments made in the noted paragraph.
PS 3450, <i>Financial instruments</i>	PS 3450.018, .028, and A33	For the reasons mentioned under PS 3400, we do not agree with the amendments made in the noted paragraphs and think that existing wording should be retained.
	Glossary	<p>PSAB has proposed to remove the narrow definition of “derecognition” and the broad definition of “recognition”. We note that other standard setting bodies, such as IFRS and IPSAS, specifically define the narrower concept of derecognition in their financial instruments standards while the definition of recognition is not present.</p> <p>We think that PSAB should consider retaining the narrower definition of derecognition as it relates to financial instrument assets and liabilities. In this case, PSAB would also need to change the terminology in the existing definition to refer to “financial instrument assets” and “financial instrument liabilities” for consistency with other consequential amendments made in this section.</p>
PS 4230, <i>Capital assets held by not-for-profit organizations</i>	PS 4230.05 (h)	<p>This paragraph is amended as follows (proposed deletion shown):</p> <p>“Service potential is used to describe the service capacity or output of a capital asset and is...”</p> <p>By deleting the word “service” in front of capacity you are left to wonder what kind of capacity this definition is referring to. Similar to the rationale outlined above under PS 3150, we recommend adding “to provide services” after “capacity”.</p>

Other editorial comments:

- The reference to PS 2700.09 (e) in PSAB’s *Detailed Amendments Proposed in the Exposure Draft, Consequential Amendments Arising from the Proposed Conceptual Framework* (hereafter referred to as “Detailed Amendments”) on page 5 of 40, should be paragraph PS 2700.09 (c).
- The proposed amendment to paragraph PS 3410.05 (e) in the Detailed Amendments on the top of page 12 of 40 says “...Section PS 1202 1000...” The “1000” should be removed.
